
Computer room renovation AC inverter

What is a computer room air conditioning (CRAC)?

A Computer Room Air Conditioning (CRAC) unit is designed for applications where close control, high precision air conditioning is essential.

How do computer room air conditioning units work?

Computer room air conditioning units work using a mechanical refrigeration cycle where air is blown over a cooling coil filled with refrigerant. Refrigerant in the cooling coil is kept cold by a compressor. Excess heat is expelled as air, water or a glycol mixture.

Why do computer rooms need a central air conditioning control system?

Usually, these units operate unattended, which requires them to communicate with each other to ensure collaborative work. Necessary redundancy, backup, and even rotation functions are necessary. CORESTAR provides precision air conditioning control solutions for computer rooms, ensuring efficient temperature & humidity regulation in data centers.

What is a data center air conditioning system?

A data center air conditioning system must always be viewed holistically. Paired with cutting-edge room cooling solutions, the holistic approach enables us to support a vast range of applications, from small computer rooms to enterprise data centers.

Application: Data center; Computer server room; library; Keyword: HVAC; Compressor: Copeland Scroll Compressor; After-sales Service Provided: Online Support; EER: 3.6; Compressor type: DC ...

Discover a full range of cooling systems for your data center and computer room air conditioning technologies that save energy and water while simplifying deployment.

A Computer Room Air Conditioning (CRAC) unit is designed specifically to monitor and maintain the temperature, humidity, and airflow in these environments. As technology ...

A computer room air conditioning (CRAC) unit is a device that monitors and maintains the temperature, air distribution and humidity in a data center, network or server room. CRAC units replace the air ...

Understanding CRAC Systems Computer Room Air Conditioning (CRAC) systems are specialized air conditioning units designed to regulate and maintain the temperature and ...

CORESTAR provides precision air conditioning control solutions for computer rooms, ensuring efficient temperature & humidity regulation in data centers. Our systems ...

A computer room air conditioning (CRAC) unit is a device that monitors and maintains the temperature, air distribution and humidity in a data center, network or server ...
