# Lithium power station factory in Czech-Republic

Where is deep lithium mining happening in the Czech Republic?

Deep lithium mining in the Czech Republic is being planned by Geomet, a company primarily owned by the Severoceske doly mining company, a member of the CEZ group. The deposit near Cinovec in the Teplice region is one of the largest in Europe, with production expected to commence between 2026 and 2028.

Will Czech Republic build a car battery factory?

According to Industry and Trade Minister Jozef Sikela, negotiations with three investors to construct a car battery factory in the Czech Republic have reached an advanced stage, underlining the nation's growing interest in the electric vehicle (EV) industry.

Could a lithium battery factory be located in the Usti region?

The extracted lithium is poised to play a significant role in producing batteries for electric cars, aligning with the country's ambitions in the EV sector. While the potential investors in the car battery factory remain undisclosed, Sikela hinted that one of the projects could be located in the Usti Region.

Why is lithium important?

Lithium, a critical component in the production of car batteries, is considered a strategic raw material vital for the economic revival of the country.
