
Photovoltaic energy storage container

Solar energy is one of the world's most abundant and easily accessible sources of renewable power. But how well do you know it? Several distinct technologies harness the ...

In 2023, the solar photovoltaic sector in the EU and globally saw the prices of the panels plummet from ca. 0.20 EUR/W to less than 0.12 EUR/W. This unsustainable situation is ...

EU countries can work together to achieve their clean energy targets through the renewable energy financing mechanism.

Solar energy also creates jobs directly. The workforce of the photovoltaic sector grew by 27% to 826 000 by the end of 2023, up from 648 100 workers in 2022. This rapid growth means that ...

ABSTRACT: The last calls of the EU 7th Framework Programme for research have been already published. About EUR 195 million have been invested in research and ...

The targets have evolved consistently since first established to help the EU reach its ambitious energy and climate goals.

The charter sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.
