
Photovoltaic folding container for research station 250kW

The targets have evolved consistently since first established to help the EU reach its ambitious energy and climate goals.

In 2023, the solar photovoltaic sector in the EU and globally saw the prices of the panels plummet from ca. 0.20 EUR/W to less than 0.12 EUR/W. This unsustainable situation is ...

The charter sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

Solar energy also creates jobs directly. The workforce of the photovoltaic sector grew by 27% to 826 000 by the end of 2023, up from 648 100 workers in 2022. This rapid growth means that ...

Nearly-zero energy buildings, is a requirement introduced by the Energy Performance of Buildings Directive EU/31/2010 (revised in 2018). It means that all new buildings - as of 2020 - must ...

In its latest report Summer Outlook 2025, published today, the European Network for Transmission System Operators for Electricity (ENTSO-E) confirms that there are no ...

The revised Energy Performance of Buildings Directive will speed up the uptake of solar photovoltaics and solar thermal - both on residential and non-residential buildings - and ...
