
Romania plant solar container energy storage system brand

What is Romania's largest battery project?

Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date. The company will build a 400 MWh facility in Floresti, Cluj county, which is expected to be operational by the end of 2025.

How much storage capacity will Romania have in 2025?

This single project will double Romania's current installed storage capacity of 398.8 MWh, a figure that comes from transmission system operator Transelectrica, and mentioned by Romania's energy minister Sebastian Burduja in April, 2025.

How many energy storage systems will Nova have in 2028?

Nova also suggested that by 2028, the company plans to install energy storage systems of up to 600 MW/1,200 MWh overall, supporting its gas power plants. Meanwhile, technology company Visual Fan announced this week that it has secured two separate contracts for a combined 182 MWh of battery energy storage system (BESS) projects.

How is Romania transforming the European energy landscape?

The investment wave, supported by key regulatory changes, is elevating Romania in the European energy landscape. Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date.

Nova Power & Gas, a subsidiary of the E-INFRA Group, has officially commissioned Romania's largest battery energy storage system (BESS), a 200 MW facility with 400 MWh of ...

The project consists of a large-scale standalone battery storage facility that Premier Energy expects to construct primarily during 2026, with commissioning anticipated in ...

Nova Power & Gas's 400 MWh project in Cluj County is the largest battery energy storage system (BESS) to date to have been connected to Romania's grid.

Econergy plans to equip every connected and ready-to-connect solar project in Romania with electricity storage capacity. The aim is to consolidate and expand its position in the Romanian renewable energy ...

Through these investments, we aim to maintain and strengthen our leadership in energy storage, while making substantial investments in gas-fired electricity generation to ...

The fully integrated energy storage system allows Elmas to store solar energy generated during the day for use during non-production hours or peak demand periods. This ...

Nova also suggested that by 2028, the company plans to install energy storage systems of up to 600 MW / 1,200 MWh overall, supporting its gas power plants. Meanwhile, ...
