
Solar modules exported from Buenos Aires

How many solar panels will Argentina install in 2024?

Argentina installed 307 MW of solar in 2024, bringing its total PV capacity to 1.67 GW by year-end, according to energy market operator Cammesa. Verano Energy, a renewables developer headquartered in Chile, has started building a 200 MW solar project in western Argentina. The installation is due for completion and connection before the end of 2025.

Is Epse launching a vertically integrated solar cell plant in Argentina?

State-owned EPSE is moving ahead with its plan to establish a vertically integrated solar cell and module manufacturing facility in Argentina's Pocito department, San Juan province. The arrival of an industrial laminator marks a major milestone for the long-delayed project.

How many MW of electricity is commissioned in Buenos Aires?

A total of 46 MW was commissioned in the month in question. Argentina's AlmaGBA tender for the Buenos Aires metro area will pay a fixed \$10/MW of electricity supplied, with storage capacity bids capped at \$15,000/MW per month.

Will YPF Luz build a 305 MW solar project in Argentina?

YPF Luz says it is ready to start building a 305 MW solar project in Mendoza, Argentina, with an initial phase of 200 MW. Argentina's Secretariat of Energy has increased the self-consumption limit under net metering from 2 MW to 12 MW to expand the country's renewable energy capacity.
