
South Africa Communications 5G Base Station Layout

How is 5G deployment progressing in South Africa?

In South Africa, 5G deployment has been progressing steadily. Major telecom operators like Vodacom, MTN, and Rain have been rolling out 5G services across various cities. As to SA 5G networks, the deployment is still in the early stages.

How many 5G sites has MTN deployed in 2024?

This year has seen the deployment of 145 new base stations, the modernisation of more than 400 sites, and capacity upgrades to more than 1,000 sites. MTN has also concluded the 5G 2024 deployment programme scope and has deployed 5G on more than 900 sites in 2024. We continue to use the midband spectrum to expand 5G coverage in the country.

Which companies are deploying 5G in South Africa?

Major telecom operators like Vodacom, MTN, and Rain have been rolling out 5G services across various cities. As to SA 5G networks, the deployment is still in the early stages. Most of the current 5G networks in South Africa are non-standalone (NSA), which means they rely on existing 4G infrastructure for certain functions.

How can 5G be used in South Africa?

for latency-sensitive services. Alternatively, they can use satellite's longer reach to complement the buildout of 5G in remote areas. There is a wide range of use cases for 5G which can be adopted in South Africa, including improved remote working, enhanced distance learning, telemedicine, surveillance and security, agriculture, mining, manufa
