What is an uninterruptible power supply?

An uninterruptible power supply, commonly known as "UPS Power Supply" is a device that is designed to supply power to your computers, servers and data centres in case of main power failure, electrical surge or unexpected power cut off.

What is a 3-phase uninterruptible power supply (UPS)?

A 3-phase uninterruptible power supply (UPS) plays a vital role in data centers, edge computing environments, or commercial or industrial applications where uptime and data integrity are critical.

What is a Hybrid UPS?

Hybrid UPS - This system consists of three modes: double conversion mode, economy mode, and active filter mode. The UPS automatically selects the power feeding mode to best suit the power situation and load conditions. It is possible to shift between the respective modes with no momentary break in output voltage.
